## YSSP Summer Research Fellowships in Austria

Every summer from 1 June to 31 August, IIASA hosts up to 50 doctoral students from around the world in its Young Scientists Summer Program (YSSP). Each participant works on a topic related to his or her PhD thesis and IIASA's research agenda, the goal being to write a publishable paper. All YSSP participants are personally mentored by IIASA senior scientists.

You should **apply** if

- you are an advanced graduate student;
- your field of study complements research at IIASA;
- you would like to pursue interdisciplinary research;
- your research and career would benefit from working with scientists from around the world; and
- you would like to explore the policy implications of your work.

An **online application form** and more information is available at [www.iiasa.ac.at/yssp](http://www.iiasa.ac.at/yssp).

Applications are accepted from October to mid-January for the following summer. **Funding** is available through IIASA National Member Organizations (NMOs) or through additional scholarships.

# www.iiasa.ac.at/yssp

Located near Vienna, Austria, IIASA is an international institute that conducts policy-oriented research into problems that are too large or complex to be solved by a single country or discipline. These problems—which include climate change, energy security, and sustainable development—must be resolved by international cooperation. IIASA research comes under the following programs:

- Advanced Systems Analysis
- Air Quality and Greenhouse Gases
- Ecosystems Services and Management
- Energy
- Evolution and Ecology
- Risk and Resilience
- Transitions to New Technologies
- Water
- World Population.
